## DUST- AND EMC FILTERS, THREE-PART, IP30

The plastic filter of the LFG series offers an IP30 level of protection, according to publication IEC592. Its components are the fan guard, the clip-on lid and the filter blanket. By replacing the plastic frame with an EMC-frame (silver), a cost effective dust+EMC-filter develops.

When the filter blanket is saturated with dust, it can be vacuum cleaned or washed with water and detergent and used again. We recommend regular cleanups, depending on the dust contamination in the environment to avoid a decrease in performance.

Filter blanket, plastic fan guard and EMC fan guard are offered separately also.
